## HOW CROPS TURN IN TO URNS

All our urns are made from our innovative straw fiber material. Straw as a material is a natural byproduct from agriculture that regenerates in less than a year.

Biodegradable paint has been used in the painting of our urns.

- Diameter: 200 mm
- Height: 240 mm
- Volume: 4.5 l
- Weight: 720-740 g

## NATURAL STRAW FIBER BIOURNS

These urns represent our straw fiber material beautifully.  
Lighter color is derived by adding natural minerals to the material.  
Darker color is derived by adding coal to the material.

The lid of the urn is sealed with small seals.

## OUR STORY

We are a Finnish company whose story began with two men who both had experienced recent loss.

We shared ideas and thoughts about funerals and burial. One common factor always brought our thoughts together — nature. We asked each other, could human burial be closer to nature?

## ECOLOGICAL

Ecological sustainability is the foundation of our company. We love this planet and want to preserve its beauty for future generations. We value nature and strive to protect it to the best of our ability.
